1. The Company

Rockbuster Stealth LLC is a movie rental company that used to have stores around the world. Facing stiff competition from streaming services such as Netflix and Amazon Prime, the Rockbuster Stealth management team is planning to use its existing movie licenses to launch an online video rental service in order to stay competitive.

2. Entity Relationship Diagram (ERD)

This Entity-Relationship Diagram (ERD) represents a snowflake schema. The schema consists of a fact table, dimension tables, and sub-dimension tables. The sub-dimension tables, such as city and country, enhance the schema by providing additional levels of detail and categorization.

3. Tables

•	Primary key
\leftrightarrows	Foreign key

Fact tables¹

Rental

	Column	Data Type	Description
a	Rental_id	SERIAL	Primary Key, identifying unique rental event
	Rental_date	TIMESTAMP (6) WITHOUT TIMEZONE	Date of movie rental
\leftrightarrows	Inventory_id	INTEGER	Unique ID, linked to inventory information
\leftrightarrows	Customer_id	SMALLINT	Unique ID, linked to customer information
	Return_date	TIMESTAMP (6) WITHOUT TIMEZONE	Date, when movie is returned to the system
\leftrightarrows	Staff_id	SMALLINT	Unique ID, linked to staff information
	Last_update	TIMESTAMP (6) WITHOUT TIMEZONE	Date and time of the last update

Table	Join
Payment	Payment.rental_id=rental_id

¹ Broadly speaking, fact tables store information about events, and dimension tables store information about the entities involved in those events. Fact tables typically have two columns: one with numerical values and one with foreign keys that link to dimension tables, which hold descriptive information about various entities.

Payment

	Column	Data Type	Description
<u> </u>	Payment_id	SERIAL	Primary Key, identifying unique payment transaction
\leftrightarrows	Customer_id	SMALLINT	Unique ID, linked to customer information
\leftrightarrows	Staff_id	SMALLINT	Unique ID, linked to staff information
\leftrightarrows	Rental_id	INTEGER	Unique ID, linked to rental information
	Amount	NUMERIC(5,2)	Total amount linked to specific rental transaction
	Payment_date	TIMESTAMP (6) WITHOUT TIMEZONE	Transaction date
